Advising

Early in the school year, each student will be assigned a Core Faculty advisor. Advisors serve to ensure that your experience at the school—academic, social, and emotional—is as good as possible. Advisors generally meet with you informally through the year. You may also seek out your advisor whenever you wish. You may also seek advice from any member of the faculty.

Art

One of the things that most distinguishes a Waldorf school from other schools is the degree to which art supports and informs the curriculum. As a student at the Waldorf School you are required to study various practical and fine arts. In addition, you are expected to supplement much of your academic work with artwork. Although this work may seem daunting at first, you will soon discover abilities you never knew you had. Also, you will find teachers and other students helpful in giving you guidelines and tips on your work. The most important thing to realize is that good artwork often takes much more time than you might expect. One drawing can take two hours or more.

Assemblies

The life of the school includes periodic assemblies. We expect you to participate when appropriate, set a good example for younger children when they are present, and dress appropriately. Girls should wear slacks and a blouse, a dress or a skirt. Boys should wear a collared shirt and a tie. Jackets are required for some assemblies. Students should not consider denim pants or sneakers appropriate for assembly dress. In some cases, we ask students to wear particular clothes—say, black pants or skirt and white shirts, in order to sing.

Athletics

We offer 3 seasons of competitive athletics—soccer in fall, basketball in winter, and tennis in spring. In 2013-2014, basketball fielded (courted?) both boys' and girls' teams, and soccer and tennis were co-ed. All teams had winning records, beating some all-boys teams.

Attendance & Punctuality

We expect students to be in class every day, all day, except in the case of illness or family emergency. (School attendance is compulsory under state and federal law to the age of 16.) Classes start at 8:30 a.m., and you should be at school by 8:20 a.m. in order to be ready to begin on time. If you arrive late, please inform the office. If you are late because of bus lateness, your lateness will be excused; others will be excused only with an explanatory note from parents. If you accumulate three unexcused latenesses you should expect disciplinary action. School ends at 2:40 p.m., and all students are dismissed then unless they are remaining for after-school activities.

Unexcused Absence

Students who are absent without a legitimate excuse risk losing credit or receiving an “F” for all work for the days they miss. Except in the cases of illness or family emergency, the school requires two weeks prior notice of any absence. Without this notice the absence may be unexcused. Please be aware that even two weeks prior notice does not guarantee that an absence will be excused; the school faculty will determine which absences are excused and which are not.

The school raises money each year for a Senior Trip and give the senior class a few days off from school for the trip. Given this relationship, it is our understanding that there are no “senior skip days,” and that any seniors who cut school should expect serious consequences. C’mon, guys.

Books

- Families buy their own books and textbooks for our school. Costs vary from year to year but average around \$400 per year.
- You will receive a list of most of the books for the year in late summer.
- Families that live in New York State can obtain many of our books through local public school districts. Our Office Manager arranges this each summer and will let you know which books are available through the district and which you must purchase yourself.
- We will try to give you as much notice as possible regarding other books; when you are asked to purchase a book, please do so as quickly as possible so that you do not fall behind in your work.
- Some books are only available through international sources; in this case, the school will purchase the books and ask families to reimburse the school.

- The school owns copies of some of the books we use. Please use these carefully and return them promptly when you are done with them. There is no charge for these books.

Bullying and Teasing; Hazing

Students have described our school as the most respectful, most inclusive school they have seen. We aim for this to be the case in relationship among students and between teachers and students. We have a strict no bullying and teasing policy; for infractions, please see “Discipline” below. Any student-only organizations are required by law to sign an anti-hazing statement (we currently have no such groups; all of our student organizations, such as the Student Council and the Improv group, have faculty advisors).

Cell Phones, MP3 players (iPods), and other Electronic Devices

All mobile or cell phones and MP3 players must be turned off during the school day, between 8:30 and 2:40 p.m., and may not be used in the school building at any time. These devices should be placed in a basket by the side entrance during the school day. They may be retrieved during lunch recess, but must be returned after lunch. Students may not use iPods or other personal stereos, video games, or other non-school related electronic apparatus of any kind on campus. Rules for use of these devices on field trips is left to teacher discretion; please comply politely with your teachers’ requests. Laptop computers are an exception to this rule; see **Computer Use** below.

College Guidance

We provide comprehensive college guidance beginning in 11th grade. For 9th grade, we recommend that you work hard and get the best grades you can. In 10th grade, you may take the PSAT for practice. It’s not too early to think about what path you will pursue in college—major, career, interests—and which colleges may interest you. In 11th grade, we will begin formal college guidance, preparing you for the SATs, discussing SAT IIs and other tests, helping you develop a list of colleges that are right for you, and recommending that you start visiting colleges. We give you two school days per semester to do this. We guide you through selection of and application to college. The path to college is well-worn, and we will help you every step of the way.

Combined Classes

Since our founding in 2002, we have combined some academic classes out of necessity. We have learned, however, that combined classes offer real social advantages and no demonstrable disadvantages. (Research demonstrates this, too.) Our high school feels more like real life, where we are not segregated by age, and, we find, a more respectful, less cliquish atmosphere. As we grow, we will combine fewer classes, but we plan to continue this practice. (Math classes are not combined in our school.)

Computer Use

We view learning to use a computer as we view learning to drive: A useful and often necessary skill that you can learn in a few hours outside of school, but not a skill worth disrupting the school day to teach.

Students may bring laptop computers to school, although computer use is rarely required during a school day. You DO NOT need to have a laptop or home computer to attend our school, although access to one may be helpful for writing papers, research, completing foreign language assignments, and other purposes.

You may use computers for class work according to teachers’ discretion.

We highly recommend that new students complete a typing tutor program such as “Mavis Beacon” (although any one will do) before the start of school. Typing is a skill you will use for years to come.

Our school has a wireless Internet router. The safety of our students is paramount, and we are also concerned that our network not be jeopardized by inappropriate use. Students and parents must sign an “Internet Appropriate Use Agreement” before accessing the school’s network.

(Please note: Students wrote and voted on the following rules for use of computers during the school day.)

1. Use of computers is generally restricted to lunch recess each day.
2. Computers are to be used for school or independent work only.
3. Computers may be used to check email or other communications regarding only school-related activities, extracurricular or after-school activities, and scheduling.
4. Students may not access social networking sites (Facebook, MySpace, etc.), watch movies or videos (including YouTube), listen to music, or play games.
5. Computers may be used at other times during the school day only with a teacher’s permission.

6. Failure to abide by these rules will result in loss of computer privileges for one week.

In addition:

- All computers should have installed and updated anti-virus software (Avast offers an excellent free version at www.avast.com.)
- You may not download anything to school computers.
- You are responsible for the safety, legality, and content of anything you download to your personal computer over the school's network.
- The school does not provide a printer for student computers or work; you are responsible for printing your own work at home. (Do not let the computer become another reason for not having your work done on time!)
- Thank you for your appropriate use of computers!

Costs and Fees in addition to Tuition

We try to keep additional costs to a minimum, but they currently include the following:

- Books: Approximately \$400 per year.
- Hermit Island (12th grade only): Approximately \$200. Includes program fee, campground fee, fuel reimbursement, and food cost.
- Field Trips: Usually 2-3 per year to Boston or New York, for example. Cost varies depending on travel arrangements and purpose, but plan on \$50 for each.
- Foreign Travel: \$1500-2000. Generally once during the four years of high school. Students raise approximately \$500 each through school fundraisers over two or more years. Many students contribute summer earnings to foreign travel costs. Some students obtain grants to help defray costs—language teachers assist with grant applications.

Decision-Making

The school has a Board of Trustees that is responsible for the legal and financial health and integrity of the school. The school has a Core Faculty that is responsible for educational policies and practices at the school. Day-to-day operations are handled by the Faculty Chair in consultation with the Core Faculty, the Board, or the Office Manager, as appropriate.

As a small, informal, respectful school, however, student consideration of school policies, rules, and practices is welcome. If there is a course you would like to have, a policy or rule you would like to change, or a new idea you would like to see instituted, you are encouraged to discuss your idea with your fellow students and any teachers you believe might be helpful to you. When you have a clear proposal to which a majority of the students agree, submit it in writing to the Core Faculty. Teachers may call for a forum or consider the proposal on its merits without a forum. In most cases, your proposal—with, perhaps, some amendments—will be approved. Off-campus lunch privileges and rules and computer use policies are the results of student initiative.

Discipline

We try to burden you with as few rules and regulations as possible. Of course, generally understood rules of decent behavior, like “please be on time and prepared for your classes” can be violated in many ways, from the virtually insignificant to the extremely serious. Disciplinary action will usually be taken in the following manner:

- For disruptions or infractions in class, the teacher of that class is primarily responsible for discipline, which may mean detention during recess or lunch. What this entails is up to the teacher.
- For more serious infractions your class advisor will be involved in the disciplinary action. He may assign detention or he may confer with your parents to resolve the problem.
- For the most serious infractions you will see the High School Chair, usually with your class advisor present. Disciplinary action at this stage may involve “in-school” suspension (for which you will attend school but spend a specified time working for the school), suspension, or expulsion. Your parents will be informed and, in the case of expulsion, asked to meet school representatives face-to-face.

Suspension

A student will be suspended by the High School Core Faculty, which includes the student's advisor and the faculty chair. Parents will be notified of any suspension. Among the actions that may result in suspension are:

- Leaving campus during school hours without permission.
- Dishonesty, including lying, cheating, stealing, or plagiarizing.

- Smoking cigarettes during school hours or on school property.
- Violence.
- Vandalism.
- “Skipping school” or “skipping a class.”

Expulsion

A student is expelled by the High School Core Faculty. Parents are present for any conference during which an expulsion occurs. Students may be expelled for any of the actions mentioned under “Suspension,” depending on the frequency or severity of the infraction(s). In addition, students will be expelled for an infraction of the drug policy.

Dress Code: See Personal Appearance

Drugs and Alcohol

The use of marijuana and other hallucinogenic or narcotic drugs is antithetical to the purposes of our school—clear thinking, strong will, deep feeling, and meaningful human interaction. The goal of our policy and any future changes to it is to prevent as many students as possible from using drugs. We aim to balance concern for an individual with concern for the culture of the school and the health of the community, but we are clear that we are a school first, and cannot provide counseling and treatment that would be better sought elsewhere.

• **Any student who uses or possesses marijuana or other illegal drugs while enrolled as a student at the school, whether on school grounds or not, will be expelled. This includes use or possession during any recess, including summer vacation. Students who tell others that they are experimenting or have experimented with drugs while enrolled at our school will be taken at their word.**

- The school will investigate reliable reports of student misconduct with regard to drug use, as, indeed, it will with any other serious allegation of misconduct.
- This investigation will begin with a meeting with parents and student. Depending on the outcome of this meeting, the Core Faculty will decide that a student may return to school, be suspended from school pending further investigation, or be expelled.
- Students who admit to drug use will be expelled.
- Students who deny that they have used drugs will be asked to take a drug test. Students and parents will be asked to sign a form consenting to drug testing. The school will then administer a drug test.
- The school may also ask to test a student when, in the judgment of the Core Faculty, a student’s behavior, attitude, performance, or reputation point toward possible drug use.
- Students who pass a drug test will be considered exonerated but may be subject to follow-up tests to provide ongoing evidence that they are not using drugs.
- Students who fail a drug test will be suspended from school while results are verified by a clinical test. Parents are responsible for obtaining a prescription for such a test, paying for the test, and releasing the results to the school. Students who fail a clinical test will be expelled from the school.

• Students who refuse a drug test when, in the judgment of the Core Faculty, one is necessary, will be presumed to have failed it.

• Students at the school are not subject to random drug tests, but we review our policy annually and will notify families of changes.

• Students who have been expelled but who wish to continue their education at the school may reapply. Readmission will depend on a student’s demonstrated wishes to return and to refrain from drug use.

• Students who use alcohol during the school day or at school functions or who bring alcohol onto school grounds, including off-campus facilities, will be expelled.

Early Dismissal

If you must be dismissed from school before the end of regular school hours, you must have a note from a parent or guardian stating the reason for your early dismissal. If you are dismissed early because of illness, the school will contact your parents or guardian.

We dismiss students because of snow or other severe weather only when bus companies or parents notify the school that they will pick their students up early. Students are not permitted to call their parents to arrange transportation. Especially during a weather emergency, the school needs its phone line.

Educational Support

We admit students behind whom we stand completely, but most students can benefit from support from time to time, and some students benefit from regular support. We offer academic or educational support before school by appointment, during recess and lunch, and after school, generally on Mondays, Wednesdays, and Fridays from 3 to 4:15. All teachers are available to help you if you need it. Teachers may require you to seek support, in which case this requirement will be communicated to your parents and arrangements made to help you succeed at our school.

Forum

“Forum” is a period given to discussion or presentation. It is scheduled when the school brings in a speaker or when students or teachers believe it would be good to take a period to discuss a topic of interest. Students may request a forum on any topic by submitting a proposal to the Core Faculty. These proposals are less formal than student proposals to change school rules or policies (see Decision-Making), and do not have to be in writing. Forum period includes teachers and students, although, when students would like to discuss a topic without teachers present, they may request a “students only” forum.

Grades and Credits

Grades are recorded each trimester (roughly: mid-November, mid-March and the end of the school year). Courses failed during the school year must be made up over the summer through summer school or private tutoring. Teachers may record letter grades from A to F or “pass/fail” grades. Pluses and minuses may be awarded at the teacher’s discretion.

Students receive credit for all courses, graded or not, including physical education and the arts. Students earn up to 7.5 credits per year. Five and a half of these credits are in the academic areas of English, math, foreign language, history & geography, and science. One and a half of these credits are in art, music, and drama. And one-half of a credit is in physical education. (One credit equals 120 class hours of instruction; this is also known as a “Carnegie unit.”)

All credits earned are recorded on a student’s transcript. Transcripts are sent to colleges at a student’s request. There is no charge for transcripts. Transcripts record a student’s grade-point average (GPA) on a scale in which 4.0 points equals an A grade average. These averages are reported to colleges, but we do not rank students based on averages or any other measure.

Graduation

Graduation is held each June at 1 p.m. on the Sunday after the last day of school. A unique feature of our graduations is that each graduate speaks for a few minutes before diplomas are awarded.

Homework

Our school has a unique approach to homework: We believe homework should be meaningful and we believe that each teacher should assign what he or she believes is necessary. Some teachers ask for a lot of work. Others believe that all work can be completed in class; these teachers assign no homework at all. We try not to assign any “busy” work, to assign only work that is helpful and meaningful (which doesn’t mean that it’s all fun). On average, you may expect about 2 hours of work per night. This consists of about ½ hour of work per night for foreign language, English, and math—although these classes do not meet every day, so you won’t have all this work every night—and one hour of work per night for your seminar. This amount will vary a lot with your ability, your speed, and your teacher.

If you want extra work, just ask. Believe it or not, students at our school often ask for extra-credit work or for extra work to improve understanding and skill or to prepare for tests.

If the work is too much, let us know. Our intention is for you to learn in the best, most efficient way, and too much anxiety or fatigue is not healthful. On the other hand, be sure you are using your time wisely and getting the help you need from day to day and class to class.

Honor Policy

As a student at the Great Barrington Waldorf High School you are on your honor at all times not to lie, to cheat, to steal, or to plagiarize. We do not ask you to sign an honor code or statement, but you may be subject to severe discipline for any infraction of our honor policy.

Honors Courses & Advanced Placement (AP)

All of our courses are Honors level and we report all courses as Honors courses on transcripts.

We do not offer Advanced Placement (AP) courses. Students have earned advanced placement in college, however, usually based on SAT II scores.

Internet Access

Internet and access to it are a privilege, not a right. Students may:

- use the Internet for appropriate educational purposes and research;
- use the Internet only with the permission of designated school staff;
- be considerate of other users on the Internet and use appropriate language for school situations;
- not intentionally degrade or disrupt Internet services or equipment. (This includes but is not limited to tampering with computer hardware or software, vandalizing data, invoking computer viruses, attempting to gain access to restricted or unauthorized network services, altering passwords, or violating copyright laws);
- immediately report any security problems or breeches of these responsibilities to appropriate school staff;
- comply with all of the rules and expectations included in the Student Internet Acceptable Use policy, administrative procedure, and Internet etiquette; and
- not divulge personal information such as addresses and telephone numbers over the Internet.

Students should understand that they have no right to privacy when they use the school Internet, and consent to staff monitoring of their communications.

Any conduct that is in conflict with these responsibilities is inappropriate and may result in termination of Internet access and possible disciplinary action.

Libraries

The school uses the beautiful library on Main Street in Stockbridge and the excellent research library at Simon's Rock College. Library cards in Stockbridge are free, and we encourage you to purchase a "community borrower's" card at Simon's Rock for \$5. We also encourage you to use your local public library and the inter-library loan system.

Lunch and Snacks

You should bring a mid-morning snack and, if you do not plan to purchase lunch off-campus, a lunch with you each day. Do not bring candy, gum or carbonated beverages other than seltzer.

Off-Campus Lunch Rules

(These rules were written by students!)

Students may leave campus at lunch time every day of the week as long as they respect the following rules:

- Students may not leave the building until dismissed from seminar.
- Students must return by 12:50 (or prior to the start of the next class after lunch); this means being in class, ready to begin, not dashing through the door.
- Students may not go off-campus alone. Only groups of two or more students are allowed to leave the building during lunch.
- Students must sign out for a particular destination and go only to that destination.
- All food purchased off campus must be consumed or stored before students return to class.
- Students must conduct themselves respectfully as representatives of the school when off-campus. All school rules regarding cigarettes, drugs, and alcohol apply when students are off-campus during lunch.
- Students who violate any of the above may lose their off-campus privileges for the next lunch period or may lose them indefinitely depending upon the violation or the number of violations.

Medication

You may not bring medication to school, either prescription medicine or over-the-counter medicine. If you require medication during the school day, a parent or guardian must come to school to administer it to you. It is against Massachusetts State law for teachers or staff to dispense any medication, prescribed or over-the-counter. If you cannot make it through the school day without medication and you cannot find a parent or guardian to administer it, you must stay home. We understand that this policy may seem unduly harsh, but it exists for your safety and for the safety of the school. Please note: Epi-pens, inhalers, and other medications meant to intervene in potentially life-threatening situations are allowed. Parents should let the office know in writing when a student carries or may require such medication. Also note: Possessing prescription medication without notifying the school's office is a violation of our Drug and Alcohol Policy.

Orientation

Each school year begins with a 3 day Orientation at Camp Hi-Rock, a 1200 acre YMCA camp about half an hour from the school. The current cost for this is \$120, which covers food, lodging, transportation, and activity fees. We hike, complete low and high-ropes challenges, introduce ourselves, talk around a campfire, and get to know each other and the school. Students return from Orientation as part of our school community, ready to learn and to participate in our school wholeheartedly.

Parent Association

In 2009-2010 the school established the Parent Faculty Partnership (PFP), formerly the Parent Association (PA), thanks to a group of enthusiastic and hard-working parents. The PFP supports new parents at the school, encourages communication among parents and teachers, organizes community spirit events like a Senior Recognition Dinner each spring and school work and cleaning days each summer, and organizes fundraising events like tag sales, spaghetti dinners, and bake sales.

Parent-Teacher Conferences

Parent-teacher conferences are scheduled each year in November and March. Teachers meet with parents to discuss in detail a student's progress. Parents or teachers may request a conference at any time of year to discuss a specific or general concern. Students may or may not be invited to such a conference.

***Parking and Driving**

Our school parking lot holds 12 vehicles and is reserved for school vans, teachers, and visitors (including parents during the school day). Students: We're sorry, but you may not park in the school's lot on Shamrock Street. We recommend that students park on Main Street/Route 102, particularly west of Pine Street, in front of Austen Riggs.

You are not permitted to leave campus in your car until dismissal. You may not drive on a field trip without parent and teacher permission. When driving during the school day or for a field trip, you are required to follow a school van if there is one on your trip. You may not return to your car during the school day. Except in extraordinary circumstances, you may not drive other students in your car during school hours. In these cases, we require written permission from the parents of all students involved.

During school events when there will be many cars present, you may park A.) on Main Street in Stockbridge; B.) In the St. Paul's Children's Center parking lot, just north of Main Street—go down the gravel drive by the first crosswalk between the St. Paul's Church and its neighbor; C.) At the Shrine of Divine Mercy at the top of Pine Street on the right. It's a bit of a walk back to the school from this location, and we will provide a shuttle when we can.

Personal Appearance (“Dress Code”)

The school expects students to maintain a neat and well-groomed appearance. More important than the specific details of what you may wear and what you may not, are the reasons for the dress code. The primary reason is that we want you to set aside that part of the day during which you are at school in several ways, one of which is through your dress. No matter the profession you choose, you will most likely have to set apart that part of the day during which you work from other, more casual parts of the day. Medieval scholars and judges, among others, put on robes to perform their duties. In the same way, when you dress for school, you are indicating your readiness to be a student.

Some dress code guidelines:

- Please do not wear a hat in the building at any time.
- Please do not wear outdoor clothing—winter coats in particular—indoors.
- Please do not wear clothing that is torn, ragged, immodest or that displays objectionable images or slogans;
- Girls may wear sleeveless blouses, but no tank tops, halter tops, spaghetti straps or exposed undershirts – and please no shirts that expose your midriff.
- Hair should be groomed, a natural color, and should not cover your eyes.
- Pants should fit properly; not so long that the cuffs drag on the floor and not worn in such a way that underwear is showing.
- Movement classes like dance, eurythmy, and physical education may have particular clothing requirements that vary from guidelines listed above.
- The most important point: Should a teacher ask you to change your clothing, please comply pleasantly.

Progress Reports

Written grade reports are sent home three times a year—November, March, and June. Trimester grade reports include the course title and the grade for the course. Final reports for the year also include course descriptions and a narrative description of the student’s performance in the course.

Projects and Internships

Depending on foreign travel, students complete a project or an internship in each of 11th and 12th grades. The projects and internships offer students the opportunity to investigate something that interests them outside of school. Projects have included acting, oil painting, electrical transformer repair, furniture making, pottery, airplane mechanics, and guitar building. Internships have included law, journalism, law enforcement, coffee roasting, and wild animal rescue. Students choose a project or find an internship, with the help of their advisors, in the fall, and then complete their work during a two to three week period in April. Students receive credit for this work and present their work in a written report and, for seniors, in a brief talk during our Senior Recognition Dinner in May.

Rules and Policies

We are not a democratic school, but we are a tightly-knit school community in which every participant has a voice. Students may request that rules and policies be changed by submitting a written proposal to the faculty. Generally, a student or group of students discusses and obtains approval from the full student body before writing a formal proposal. Teachers then discuss and approve, with or without amendments, the student proposal. Lunch rules, computer use rules, and aspects of our drug and alcohol policy have been re-written through this process. We find that students who have a voice in creating school rules and policies are more likely to respect and uphold them.

SATs and SAT IIs

We recommend that students take the PSAT in 10th and 11th grade, and the SAT in 11th and 12th grade. Those students who apply to colleges that request SAT II (achievement test) scores should generally take these as late in 12th grade—usually in late fall—as possible. Our students often do well on foreign language, math level I, and literature tests, although we have also had students do well in history and science.

Some students choose not to take SATs at all and apply to colleges that do not require these tests.

Some students, particularly those with some learning challenges, may do well to take the ACT instead of the SAT. It is a test similar to the SAT except that it is focused slightly more on what students know and not on what used to be called their “IQ.” (Despite any claims to the contrary, the SAT is still an IQ test. Some parents may recall that it used to be called the “Scholastic Aptitude Test,” but the letters SAT have not stood for that—or for anything else—for more than ten years. No correlation between SAT scores and aptitude can be measured, and SATs are relatively poor at predicting success or GPA in college.)

We devote approximately 3 weeks each year in English and math classes in 11th and 12th grades to preparing students for the SAT. This preparation serves to review material students have already learned, to allay potential fear and anxiety around the test, and to offer strategies for and practice in taking the test.

Our students generally score about 100 points above national averages on the SAT. Our students average 600 on math and 630 on verbal portions of the SAT. (These scores are reported out of 800 possible points.)

School Closings

If weather forces the Rudolf Steiner School or the Berkshire Hills Regional School District to close, we will be closed. School closings will be announced on:

1. The school’s answering machine, usually before 6 a.m. and no later than 7 a.m.
2. Telephone: The school phone tree will notify parents after receiving word from the Faculty Chair.
3. Television: If Berkshire Hills Regional School District is closed, we are also closed.

Seminars

A seminar is a 1.5 to 2 hour class each morning for three or four weeks on one subject. The hours usually include a review of the previous days’ work, a presentation of new material, and time for you to work on your own. Time usually passes quickly. It is important that you stay on top of your work; a project or paper assigned in the first week of the block is due before you know it. Also, if you miss a couple of assignments early in the block, you may be playing catch-up right to the end. History, literature, and science are taught primarily in seminar blocks. Each seminar runs for approximately 30 hours, and you receive .25 credit for passing it.

Instead of a year of biology, for instance, you complete 6 seminars in your 4 years of high school, for 1.5 credits in biology.

Seminar Books

Many courses, particularly those taught in seminar courses, require a seminar book. This generally consists of a chronological collection, with title page and table of contents, of the work from the course. This work often includes notes from presentations rewritten in essay form, essays, tests, labs (if any), drawings, and any other work the teacher wishes to have included. Book work is usually required to be done on unlined paper.

Drawings and plates should be done on heavy drawing paper.

Seminar books should be neat and attractive. The pages should have reasonable margins, and students should strive to present their work as clearly as possible. Research papers and some other work may be typed, but much work may be done by hand. Each teacher will expect something slightly different, and each teacher will be sure to let you know what to do.

Senior Trip

The school raises money each year for a Senior Trip and give the senior class a few days off from school for the trip. Given this relationship, it is our understanding that there are no “senior skip days,” and that any seniors who cut school should expect serious consequences. C’mon, guys.

Shuttle from and to Steiner School

We offer a shuttle from and to the Great Barrington Rudolf Steiner School each day, primarily to accommodate students who are bused to Steiner from Columbia County, NY. Other students may ride the shuttle if there is space. In order to ensure space on the shuttle, please call the school’s office so that we expect you. The shuttle leaves the Steiner School at 8 a.m. each day and returns by 3 p.m. Since our move to Stockbridge, we have added a stop in Great Barrington. The shuttle picks up next to the Berkshire Community College South County Center at 8:10 a.m. and drops off by the Information booth in front of CVS at 2:50 p.m.

Supplies

The school asks you to order necessary textbooks and some other course materials. In some cases the school will purchase books and supplies and then bill you for these. We try to keep these costs as low as possible; parents can expect to pay about \$400 per year for books and class materials other than personal school supplies. New York State families can obtain textbooks or reimbursement from their public school districts. It is a student’s responsibility to obtain books and supplies punctually! You are responsible for obtaining your own classroom supplies, including such items as pens, pencils, binders, paper, and floppy disks or CDs. Bring required supplies and books to class every day. “I didn’t know we needed that today” is not a valid excuse.

Work and Recycling Program

The last ten minutes of each day (usually from 2:30-2:40 p.m.) are devoted to cleaning the school. Faculty and students clean the bathrooms, water plants, vacuum floors, empty trash, and so on. You will be assigned a work period job to which you report every day. Please perform your job well and cheerfully.
